PET/EVOH/PE packaging material is a multi-layer packaging material made of polyethylene terephthalate (PET), ethylene-vinyl alcohol copolymer (EVOH) and polyethylene (PE) through a composite process. PET provides high strength and transparency, EVOH prevents the penetration of gases such as oxygen and carbon dioxide with its excellent gas barrier properties, and PE gives the material good heat sealing and chemical resistance. This composite material combines the advantages of each layer and is often used in packaging scenarios such as food and medicine that require high barrier properties and storage resistance. It can effectively extend the shelf life of the contents and protect product quality.
