Abstracts

The global PETG 3D Printing Filament market size is predicted to grow from US$ 302 million in 2025 to US$ 692 million in 2032; it is expected to grow at a CAGR of 11.0% from 2026 to 2032.

PETG 3D printing filament is a melt deposition molding consumable mainly made of polyethylene terephthalate copolymer modified material as the main substrate, which is dried from raw materials, modified by formula, melted by extrusion, cooled by sizing, and wound. The common wire diameters are 1.75 millimeters and 2.85 millimeters. PETG has good toughness, interlayer bonding strength, chemical resistance, dimensional stability, and transparency. The printing temperature is usually lower than polycarbonate, and the degree of warping is also significantly lower than ABS. Therefore, it can achieve a good balance between printing convenience and engineering performance. Mainly used for functional prototypes, electronic and electrical casings, mechanical components, industrial fixtures, robot parts, automotive parts, display models, packaging accessories, and consumer goods manufacturing. PETG has a certain degree of moisture absorption, and drying before printing can help reduce problems such as bubbles, wire drawing, surface roughness, and decreased interlayer performance.

In 2025, global PETG 3D printing filament production reached approximately 30,423 Tons, with an average global market price of around US$ 10.19 per kg.The annual production capacity of PETG 3D printing filament is 40000 tons, with a gross profit margin of about 25%.

The upstream mainly includes PETG copolyester resin, color masterbatch and functional additives, carbon fiber and glass fiber, paper or plastic wire reels, aluminum-

plastic composite bags, and desiccants.

The downstream includes 3D printer brands, consumables distributors, e-commerce platforms, printing service providers, educational research institutions, maker users, industrial design enterprises, as well as automotive, robotics, electronic appliances, medical models, and consumer goods manufacturing enterprises.

Raw material costs account for 67%; Labor cost is 8%; The manufacturing cost is 25%.

PETG 3D printing filament has become an important category for connecting consumer grade materials and engineering grade materials. Its market development is mainly driven by the popularity of high-speed desktop printers, the increasing demand for functional component printing, the increasing acceptance of low warpage and high toughness materials by users, and the expansion of small batch customized manufacturing. Compared with PLA, PETG has more advantages in impact resistance, moisture resistance, chemical resistance, and long-term performance. Compared with ABS, it has the characteristics of lower odor, stable molding, and better adaptability to open equipment. Therefore, it continues to expand its application in education and research, maker manufacturing, electronic casings, robots, automotive modification parts, and industrial auxiliary tools. In the future, industry competition will shift from basic colors, wire diameters, and low-priced supply to high-speed forming, low drawing, low moisture absorption, surface quality, batch consistency, and compatibility with automatic feeding systems. Recycled PETG will be driven by circular economy policies, brand carbon reduction goals, and consumer environmental demands. High transparency, carbon fiber reinforced, flame retardant, and anti-static products are expected to form higher added value in the fields of electronics and electrical, automotive, and industrial equipment.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “PETG 3D Printing Filament Industry Forecast” looks at past sales and reviews total world PETG 3D Printing Filament sales in 2025, providing a comprehensive analysis by region and market sector of projected PETG 3D Printing Filament sales for 2026 through 2032. With PETG 3D Printing Filament sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world PETG 3D Printing Filament industry.

This Insight Report provides a comprehensive analysis of the global PETG 3D Printing

Filament landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on PETG 3D Printing Filament portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global PETG 3D Printing Filament market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for PETG 3D Printing Filament and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global PETG 3D Printing Filament.

This report presents a comprehensive overview, market shares, and growth opportunities of PETG 3D Printing Filament market by product type, application, key manufacturers and key regions and countries.

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global PETG 3D Printing Filament Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for PETG 3D Printing Filament by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for PETG 3D Printing Filament by Country/Region, 2021, 2025 & 2032
2.2 PETG 3D Printing Filament Segment by Type
  2.2.1 Standard PETG Filament
  2.2.2 rPETG Filament
  2.2.3 PETG 3D Printing Filament Sales by Type
    2.2.3.1 Global PETG 3D Printing Filament Sales Market Share by Type (2021-2026)
    2.2.3.2 Global PETG 3D Printing Filament Revenue and Market Share by Type (2021-2026)
    2.2.3.3 Global PETG 3D Printing Filament Sale Price by Type (2021-2026)
