Pharma Grade Rigid PVC Composite Film is a high-performance material meticulously engineered for pharmaceutical packaging applications. It is centered around polyvinyl chloride (PVC) as the fundamental component and is fabricated through a combination of advanced technologies and other compatible materials to form a composite structure. This composite film exhibits remarkable rigidity and strength that far exceed those of ordinary packaging materials. Throughout all the processes of drug circulation, be it during bumpy transportation, stacked storage, or frequent handling and sales, it offers steadfast protection to the enclosed medications. It shields them from external forces like compression and impact, effectively maintaining the original forms of solid pharmaceuticals and preventing tablets from crumbling or capsules from deforming.

United States market for Pharma Grade Rigid PVC Composite Film is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
