The global Pharmaceutical Grade HCO (Hydrogenated Castor Oil) market size is predicted to grow from US\$ 2115 million in 2025 to US\$ 3220 million in 2032; it is expected to grow at a CAGR of 6.5% from 2026 to 2032.

Pharmaceutical grade HCO (hydrogenated castor oil) is a high-purity excipient derived from the catalytic hydrogenation of refined castor oil, primarily consisting of glycerol tris(12-hydroxystearate). It is produced under stringent GMP standards and is characterized by its superior chemical stability and hydrophobic properties, making it an essential lubricant, stiffening agent, or matrix-former for controlled-release systems. This report primarily focuses on pharmaceutical-grade HCO and its derivatives, such as Polyoxyl Hydrogenated Castor Oils (e.g., PEG-40 Hydrogenated Castor Oil), which are widely utilized as potent solubilizers and emulsifiers in liquid formulations. Compared to industrial grades, pharmaceutical-grade HCO and its derivatives must adhere to rigorous pharmacopoeia standards (such as USP, EP, or ChP), ensuring strict control over acid values, impurity profiles, and biocompatibility for patient safety. In 2025, global pharmaceutical grade HCO sales volume was 925,000 tons, with an average unit price of US\$2,445 per ton and a gross profit margin ranging from 25% to 45%. The global pharmaceutical-grade HCO industry chain is based on upstream castor seed cultivation and castor oil production. Raw materials are mainly concentrated in regions rich in castor resources such as India, China, and Brazil. After hydrogenation, refining, and pharmaceutical-grade quality control, intermediate products are formed. In the midstream, fine chemical and pharmaceutical excipient companies with GMP systems complete deep processing, focusing on controlling impurities, peroxide value, and batch stability. Downstream, it is mainly used in the pharmaceutical field as a nonionic surfactant, solubilizer, and emulsifier, widely used in injections, oral liquids, soft capsules, and topical preparations. It also extends to medical nutritional preparations

and some high-end medical device-related formulations. The overall demand is highly correlated with the global trend of generic drugs, biological agents, and premium formulations.

United States market for Pharmaceutical Grade HCO (Hydrogenated Castor Oil) is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
