Abstracts

The global Pharmaceutical Grade Melatonin Products market size is predicted to grow from US\$ 1166 million in 2025 to US\$ 1850 million in 2032; it is expected to grow at a CAGR of 7.0% from 2026 to 2032.

In 2024, global Pharmaceutical Grade Melatonin Products production reached approximately 55.85 million units, with an average global market price of around US\$ 20 per unit.

Pharmaceutical-grade melatonin products are prescription drugs or high-standard pharmaceutical preparations made from melatonin raw materials produced in accordance with pharmaceutical standards (such as USP, EP, BP, etc.) and GMP regulations. These include sustained-release tablets, immediate-release tablets, microcapsules, oral liquids, sprays, and hospital-prepared formulations, used to treat or assist in the treatment of insomnia, circadian rhythm disorders, sleep disorders in the elderly, and insomnia related to autism spectrum disorder (ASD) and neurogenetic diseases in some children. Representative products include Neurim/Aspen's sustained-release tablets Circadin and children's sustained-release tablets Slenyto, as well as various generic or branded melatonin preparations marketed by companies such as Aspen Pharmacare, AGB-Pharma, Alturix, Pharma Nord, Teva, and Mylan. Compared to ordinary food-grade or dietary supplements, pharmaceutical-grade products adhere to stricter drug regulatory requirements regarding raw material purity, impurity profile control, dissolution and sustained-release profiles, bioequivalence, stability testing, and evidence of clinical efficacy and safety. They are often dispensed as prescription drugs in hospitals, pharmacies, or after online consultations with doctors/pharmacies.

From an industry chain perspective, the upstream of pharmaceutical-grade melatonin

products mainly consists of melatonin API and excipient suppliers that meet USP/EP/BP standards, including Swati Spentose, Biophore India, and Laurus Labs in India, and Huanggang Saikang (Nutrakey system) and Sichuan Benepure in China. These suppliers provide pharmaceutical-grade melatonin and excipients with a purity of 98–99.9% through pharmacopoeia standards, DMF/ASMF, EU-WC, and other systems. The midstream is handled by pharmaceutical companies specializing in neuroscience and sleep, such as Neurim Pharmaceuticals, AGB-Pharma, Alturix, Teva, and Mylan, which develop formulations and manufacture pharmaceutical products, forming extended-release tablets, pediatric formulations, and generic drugs for various countries. The downstream is provided to end patients through hospital prescriptions, community pharmacies, public health insurance catalogs, and compliant online consultation platforms for the treatment of chronic insomnia in the elderly, ASD/NGD-related insomnia in children, and jet lag syndrome. Some high-standard dietary supplement brands also use pharmaceutical-grade melatonin. APIs are sold to physicians and functional medicine clinics. Overall, the high degree of specialization and international certification requirements on the raw material side, the sustained-release technology and pediatric-specific dosage form development on the formulation side, and the regulatory and reimbursement policies of various countries downstream, together determine the positioning and profit model of pharmaceutical-grade melatonin products between 'pharmaceuticals' and 'high-end nutritional products'.

The annual production capacity of a single-line Pharmaceutical Grade Melatonin Products is approximately 500k units, with a gross profit margin of approximately 55%-70%.

Overall, pharmaceutical grade melatonin products occupy a niche, higher-end position between conventional hypnotic drugs and over-the-counter melatonin supplements, combining physician-led, evidence-based use with growing public awareness of sleep health. Thanks to a more favourable profile in terms of dependence, safety and tolerability during long-term use, prolonged-release melatonin has gradually been incorporated into clinical guidelines and expert recommendations in many countries for older adults with chronic insomnia, patients with circadian rhythm disorders and children with neurodevelopmental conditions associated with sleep difficulties, creating a relatively stable base of prescription demand. On the supply side, originator products and a small group of companies with strong modified-release and pediatric-formulation capabilities still enjoy notable barriers to entry in several markets, but as patents and data-exclusivity periods expire, generic competitors are entering, intensifying price competition while also broadening the range of dosage forms and dosing strategies available. Regionally, some European and Commonwealth countries are leveraging

prescription and reimbursement channels to drive uptake, North America shows a mix of prescription use and high-standard OTC positioning, and emerging markets are gradually opening as regulatory frameworks become clearer. In summary, pharmaceutical grade melatonin products are likely to sustain growth that outpaces traditional hypnotics but is somewhat more measured than that of the broader melatonin supplement category, functioning primarily as relatively safe, long-term sleep and circadian-management tools within medical channels, clearly differentiated in branding and regulation from ordinary melatonin nutraceuticals.

LP Information, Inc. (LPI) ' newest research report, the “Pharmaceutical Grade Melatonin Products Industry Forecast” looks at past sales and reviews total world Pharmaceutical Grade Melatonin Products sales in 2025, providing a comprehensive analysis by region and market sector of projected Pharmaceutical Grade Melatonin Products sales for 2026 through 2032. With Pharmaceutical Grade Melatonin Products sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Pharmaceutical Grade Melatonin Products industry.

This Insight Report provides a comprehensive analysis of the global Pharmaceutical Grade Melatonin Products landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Pharmaceutical Grade Melatonin Products portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Pharmaceutical Grade Melatonin Products market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Pharmaceutical Grade Melatonin Products and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Pharmaceutical Grade Melatonin Products.

This report presents a comprehensive overview, market shares, and growth opportunities of Pharmaceutical Grade Melatonin Products market by product type, application, key manufacturers and key regions and countries.

Key Questions Addressed in this Report

What is the 10-year outlook for the global Pharmaceutical Grade Melatonin Products market?

What factors are driving Pharmaceutical Grade Melatonin Products market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Pharmaceutical Grade Melatonin Products market opportunities vary by end market size?

How does Pharmaceutical Grade Melatonin Products break out by Type, by Application?

The report requires updating with new data and is sent in 48 hours after order is placed.

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global Pharmaceutical Grade Melatonin Products Annual Sales 2021-2032
- 2.1.2 World Current & Future Analysis for Pharmaceutical Grade Melatonin Products by Geographic Region, 2021, 2025 & 2032
- 2.1.3 World Current & Future Analysis for Pharmaceutical Grade Melatonin Products by Country/Region, 2021, 2025 & 2032

2.2 Pharmaceutical Grade Melatonin Products Segment by Type

- 2.2.1 Tablets
- 2.2.2 Oral Solution
- 2.2.3 Pharmaceutical Grade Melatonin Products Sales by Type
 - 2.2.3.1 Global Pharmaceutical Grade Melatonin Products Sales Market Share by Type (2021-2026)
 - 2.2.3.2 Global Pharmaceutical Grade Melatonin Products Revenue and Market Share by Type (2021-2026)
 - 2.2.3.3 Global Pharmaceutical Grade Melatonin Products Sale Price by Type (2021-2026)

2.3 Pharmaceutical Grade Melatonin Products Segment by Application

- 2.3.1 Hospital and Clinic
- 2.3.2 Pharmacy
- 2.3.3 Other
- 2.3.4 Pharmaceutical Grade Melatonin Products Sales by Application
 - 2.3.4.1 Global Pharmaceutical Grade Melatonin Products Sale Market Share by Application (2021-2026)
 - 2.3.4.2 Global Pharmaceutical Grade Melatonin Products Revenue and Market Share

by Application (2021-2026)
