The global Phosphonic Acid market size is predicted to grow from US\$ 2605 million in 2025 to US\$ 3629 million in 2032; it is expected to grow at a CAGR of 4.9% from 2026 to 2032.

Phosphonic Acid is an organophosphorus compound characterized by the presence of direct phosphorus-carbon (P-C) bonds or phosphorus in a reduced oxidation state, widely used as an intermediate in water treatment chemicals, agrochemicals, flame retardants, scale inhibitors, chelating agents, pharmaceuticals, and specialty chemical formulations. Industrial phosphonic acids include compounds such as aminotris(methylene phosphonic acid) (ATMP), hydroxyethylidene diphosphonic acid (HEDP), and phosphonobutane tricarboxylic acid (PBTC), which are valued for their excellent metal ion sequestration, corrosion inhibition, thermal stability, and anti-scaling performance in harsh industrial environments. The supply chain of Phosphonic Acid begins with upstream raw materials including phosphorus trichloride (PCl₃), phosphorous acid, formaldehyde, ammonia derivatives, alkyl amines, acetic acid derivatives, and other petrochemical intermediates. Midstream production involves phosphonation reactions, chlorination, hydrolysis, purification, concentration, and formulation processes carried out by specialty chemical manufacturers. Downstream distribution supplies phosphonic acid products to industries such as industrial water treatment, oil & gas processing, detergents, textile processing, pulp & paper, agriculture, construction chemicals, electronics cleaning, and pharmaceutical synthesis, where they are incorporated into corrosion inhibitors, fertilizer additives, cleaning agents, and specialty performance chemicals. In 2025, global Phosphonic Acid output was about 1.9 million tons with 2.3 million tons of capacity, average prices of USD 1,200-2,500 per ton, and gross margins around 24%.

United States market for Phosphonic Acid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Phosphonic Acid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
