According to our LPI (LP Information) latest study, the global Photovoltaic Hydrogen Production market size was valued at US\$ 58 million in 2023. With growing demand in downstream market, the Photovoltaic Hydrogen Production is forecast to a readjusted size of US\$ 2147.2 million by 2030 with a CAGR of 67.6% during review period.

The research report highlights the growth potential of the global Photovoltaic Hydrogen Production market. Photovoltaic Hydrogen Production are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Photovoltaic Hydrogen Production. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Photovoltaic Hydrogen Production market.

Hydrogen production by photovoltaic power generation mainly uses the direct current generated by the photovoltaic power generation system to directly supply hydrogen production electricity to hydrogen production stations. Compared with traditional power stations, the photovoltaic DC power generation system reduces the process of inverter and boost. The main equipment and facilities include photovoltaic modules, combiner boxes, brackets, foundations, grounding devices, etc., photovoltaic modules can be stringed according to the input voltage and current requirements of the hydrogen production station. , Parallel configuration to improve system efficiency. The current technology for hydrogen production by electrolysis of water is mature, the equipment is simple, and the operation and management are relatively convenient. The hydrogen

produced is of high purity and pollution-free. It mainly includes hydrogen production by alkaline electrolyzer, hydrogen production by PEM Electrolyzer, and solid oxidation. Three technical routes for hydrogen production from Solid Oxide Electrolyzer

Global Photovoltaic Hydrogen key players include Toyota, Toshiba, etc. Global top two manufacturers hold a share over 75%.

Japan is the largest market, with a share over 35%, followed by North America, and Europe, both have a share over 35 percent. In terms of product, less than 10MW is the largest segment, with a share nearly 80%. And in terms of application, the largest application is Fuel Cell, followed by Petroleum and Chemical, Metal Smelting, etc.
