Circuit breakers are an important component of the solar system. Between Direct Current and Alternating Current, it serves as a barrier. A barrier between the panels and the alternating current is necessary for installation and routine maintenance. Electric protection requires the use of circuit breakers. Because they can continue to operate even when the alternating current unit has completely failed, circuit breakers are essential. When used, they may require less maintenance, be more dependable, and have a lower failure rate.

The global Photovoltaic Molded Case Circuit Breaker market size is projected to grow from US\$ 721 million in 2024 to US\$ 1253 million in 2030; it is expected to grow at a CAGR of 9.6% from 2024 to 2030.
