The global Phytosterols market size is predicted to grow from US\$ 1002 million in 2025 to US\$ 1741 million in 2031; it is expected to grow at a CAGR of 9.6% from 2025 to 2031.

Phytosterols, which encompass plant sterols and stanols, are phytosteroids similar to cholesterol which occur in plants and vary only in carbon side chains and/or presence or absence of a double bond. Stanols are saturated sterols, having no double bonds in the sterol ring structure. More than 200 sterols and related compounds have been identified. Free phytosterols extracted from oils are insoluble in water, relatively insoluble in oil, and soluble in alcohols.

Phytosterol-enriched foods and dietary supplements have been marketed for decades. Despite well documented LDL cholesterol lowering effects, no scientifically proven evidence of any beneficial effect on cardiovascular disease (CVD) or overall mortality exists

The major players in global Phytosterols market include Raisio, BASF, ADM, etc. The top 3 players occupy about 60% shares of the global market. North America and Europe are main markets, they occupy about 80% of the global market. β -Sitosterol is the main type, with a share about 60%. Food and Beverage is the key application, which holds a share about 70%.
