Compared with ordinary hot-rolled steel plates, pickled steel plates remove surface oxide scale, improve the surface quality of steel, and are convenient for welding, oiling and painting. At the same time, after pickling, smoothing and shearing, the dimensional accuracy is high, which can make the plate shape change to a certain degree, and it is more smooth and suitable for actual use. In addition, the pickled steel plate improves the surface finish of the original hot-rolled coil and enhances the appearance effect.
