Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Large, heavy, and with four sturdy walls and a roof, hard-side truck campers offer protection against anything and everything outside of the rig. In addition to offering supreme protection against outside forces, hard-side truck campers are better insulated than pop-up varieties and are thus much more comfortable in extreme temperatures. A pickup camper, also known as a slide-in camper or truck camper, is a type of recreational vehicle (RV) that is designed to be loaded onto the bed of a pickup truck. These campers are distinct from towable trailers or motorhomes in that they don't require a separate vehicle for towing; instead, they are carried by the pickup truck itself.

The global Pickup Camper market size is projected to grow from US\$ 196 million in 2024 to US\$ 260 million in 2030; it is expected to grow at a CAGR of 4.8% from 2024 to 2030.
