The global Pima Cotton Seeds market size is predicted to grow from US$ 82.17 million in 2025 to US$ 117 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

Pima Cotton Seeds, Extra-long Staple Cotton Seed (ELS Cotton Seed) refers to commercial planting seed used to cultivate cotton varieties that produce extra-long, high-quality fibers, primarily varieties of Gossypium barbadense. Cotton produced from these seeds is characterized by superior fiber length, strength, fineness, and spinning performance compared with conventional upland cotton. Commercial ELS cotton seeds are typically developed through varietal selection, hybrid or pedigree breeding, delinting, cleaning, coating, and seed treatment processes to improve germination, field emergence, pest and disease resistance, and agronomic adaptability. Compared with standard upland cotton seed, ELS cotton breeding places greater emphasis on fiber length, strength, micronaire, uniformity, and maturity, while also balancing yield, early maturity, drought tolerance, salinity tolerance, and regional adaptability.

Pima Cotton Seeds is mainly used for the production of Pima cotton, Egyptian cotton, and other premium long-fiber cotton types. The resulting fiber is widely used in high-count yarns, fine textiles, premium shirting, bedding, and other high-end textile products. Cultivation is relatively concentrated in regions with suitable dry climates and irrigation conditions, including the southwestern United States, Xinjiang in China, Egypt, and selected areas of Central Asia and other cotton-producing regions. Because ELS cotton requires specific climatic and agronomic conditions and breeding programs must simultaneously optimize fiber quality and yield stability, the market for ELS cotton seed is significantly smaller than the conventional cotton seed market but generally features higher specialization and higher unit seed value.

In 2025, global Pima Cotton Seeds production reached 10000 tonnes, with a unit price

of $8400 per tonne and a gross profit margin of 40%.
