Abstracts

The global Pipe Cold Cutting and Beveling Machine market size is predicted to grow from US\$ 165 million in 2025 to US\$ 240 million in 2032; it is expected to grow at a CAGR of 5.5% from 2026 to 2032.

The Pipe Cold Cutting and Beveling Machine market covers specialized industrial equipment that mechanically severs pipes and prepares weld ends through turning, milling, or orbital cutting processes without applying a thermal cutting source. The research scope primarily encompasses split-frame or clamshell machines mounted around in-line pipes, chain-mounted traveling systems, orbital cutting systems with beveling capability, and stationary integrated equipment capable of completing both cut-off and bevel preparation. A typical system consists of a clamping frame, rotating machining ring or traveling track, cutting and beveling tool slides, automatic or controlled feed mechanisms, drive modules, and alignment components. Pneumatic, electric, hydraulic, and servo-controlled drives are selected according to pipe diameter, wall thickness, material, installation space, hazardous-area requirements, and required machining accuracy. Core functions may include straight severing, simultaneous cutting and beveling, compound or J-bevel preparation, facing, counterboring, and weld removal. The equipment is primarily used in oil and gas pipelines, refineries, chemical plants, power and nuclear facilities, offshore infrastructure, shipbuilding, LNG projects, pipe-spool fabrication, and industrial maintenance, where accurate weld preparation, limited heat effects, and reliable operation in confined or hazardous environments are required.

Key Findings

In 2025, global Pipe Cold Cutting and Beveling Machine production reached

approximately 6,471 Units. The average price is approximately \$26,000.

Split-frame clamshell configurations remained the dominant architecture for in-situ maintenance, shutdown, and pipeline modification work

The top five supplier groups accounted for about 54% of revenue, while regional manufacturers formed a fragmented long tail

Market Trends

The Pipe Cold Cutting and Beveling Machine market is evolving through incremental but commercially important improvements rather than a fundamental change in machining principles. Product development increasingly emphasizes lower radial and axial clearance, lighter split frames, faster centering, modular tool slides, automatic feed, improved rigidity, and wider compatibility with carbon steel, stainless steel, duplex steel, nickel alloys, and thick-wall pipe. Customers are also seeking systems that combine severing, beveling, facing, and counterboring within one platform, reducing equipment changes during short maintenance windows. Pneumatic and hydraulic systems remain important for hazardous and heavy-duty work, while electric and servo-controlled configurations are gaining relevance in fabrication shops, nuclear projects, and applications requiring repeatable machining parameters. Remote operation, digital process settings, automatic speed control, and machining-data recording are expected to penetrate high-value projects first. At the same time, manufacturers are extending modular product families across a wider diameter range, enabling customers to use common drives, tooling concepts, and operating procedures across multiple frame sizes.

Market Dynamics

Drivers

Demand is supported by the maintenance and modification requirements of aging pipelines, refineries, chemical plants, power stations, offshore platforms, and marine assets. Scheduled shutdowns create a need for equipment that can be installed quickly and deliver weld-ready pipe ends within limited operating windows. Mechanical cold cutting is particularly valuable where thermal processes are restricted because of combustible materials, hazardous atmospheres, metallurgical concerns, or nearby operating equipment. Increasing use of stainless steel, duplex steel, chromium-molybdenum steel, and nickel-based alloys also raises the importance of controlled

cutting and consistent bevel geometry. Nuclear maintenance and decommissioning, LNG infrastructure, offshore development, and the expansion of automated welding further support demand for accurate, low-clearance, and application-specific systems.

Restraints

Market expansion is moderated by the long operating life of professional equipment and the established availability of rental, refurbished, and remanufactured machines. Large-diameter and hydraulic systems involve considerable initial investment, while purchasing decisions may be delayed when contractors can rent equipment for a specific turnaround or pipeline project. Demand is also project-driven and can fluctuate with maintenance schedules, energy-sector capital expenditure, and the timing of industrial construction. In workshop environments, conventional saws, automated pipe-fabrication lines, and certain numerical-control cutting systems may provide a lower-cost alternative when hazardous-area operation and in-situ installation are not required. The need for size-specific frames, tooling, and operator training can further increase the total cost of ownership.

Opportunities

The most attractive opportunities are emerging in nuclear life-extension and decommissioning programs, offshore and subsea maintenance, LNG terminals, hydrogen transportation infrastructure, carbon capture and storage pipelines, and high-alloy process piping. These applications require accurate machining, controlled weld preparation, and equipment that can operate in restricted spaces or difficult environmental conditions. Additional potential exists in high-purity stainless-steel piping for semiconductor, pharmaceutical, and advanced manufacturing facilities, where orbital cutting, repeatability, and contamination control are important. Manufacturers can also expand through modular frame systems, automated feeding, remote control, equipment monitoring, and integrated cutting-and-welding preparation workflows. Chinese and Indian suppliers have opportunities to move beyond standardized small and medium models into larger-diameter, hydraulic, and application-certified equipment.

Challenges

Manufacturers must maintain machining accuracy under variations in pipe ovality, wall thickness, corrosion, surface condition, and installation alignment. Achieving sufficient structural rigidity while reducing machine weight and clearance remains an important engineering challenge, especially for large-diameter and thick-wall applications.

Suppliers also face long customer qualification cycles in nuclear, offshore, high-purity, and other safety-critical industries. Global competition requires extensive distributor, spare-parts, training, and service coverage, which can be difficult for smaller manufacturers to establish. Price competition from regional suppliers, product imitation, foreign-exchange movements, tariffs, and variable component lead times may pressure profitability. The industry must also address operator shortages by simplifying setup, reducing dependence on manual adjustment, and improving process repeatability.

Industry Chain Analysis

The upstream supply chain includes high-strength alloy steel and aluminum used for machine rings and housings, precision bearings, gears, drive pinions, fastening and clamping components, pneumatic motors, electric motors, hydraulic motors and power units, servo systems, control components, and high-performance cutting tools. Machine rigidity, bearing accuracy, gear engagement, tool-slide stability, and drive reliability directly influence surface finish, cut perpendicularity, bevel consistency, and equipment life. Precision-machined split rings, tool holders, bearings, gear systems, and drive modules represent major hardware cost elements, while engineering design, testing, certification, and application customization contribute a significant portion of value in high-end systems.

Midstream participants undertake mechanical design, machining, heat treatment, assembly, calibration, tooling development, and performance testing. Value creation is concentrated in diameter coverage, low-clearance design, fast and accurate alignment, resistance to cutting loads, adaptability to different pipe materials, and reliable operation in demanding environments. Downstream channels include direct sales, authorized distributors, rental organizations, field-machining contractors, engineering and construction companies, maintenance contractors, pipe-fabrication facilities, and industrial asset owners. Premium suppliers generally achieve stronger pricing through established brands, broad product ranges, project engineering, global service coverage, and certified applications, while regional manufacturers compete primarily through price, delivery speed, and customized configurations.

Segment Insights

Split-frame or clamshell equipment forms the largest product segment because it can be opened and mounted around an existing pipeline without access from the pipe end. This structure is widely used in refinery turnarounds, power-plant maintenance, pipeline tie-ins, valve replacement, and offshore repair. Chain-mounted traveling machines address

very-large-diameter pipes and applications where conventional ring sizes become impractical, while orbital systems are more prominent in small- and medium-diameter stainless-steel, high-purity, and prefabrication work. Stationary integrated systems occupy a smaller but distinct position in repetitive workshop production.

By drive type, pneumatic systems remain important in hazardous areas, while hydraulic equipment is favored for large diameters, heavy wall thicknesses, and high cutting loads. Electric machines are widely adopted for general construction and shop use because they require less supporting equipment. Servo-controlled systems remain a premium segment but offer attractive potential where customers require repeatable feed, controlled cutting speed, automated operation, and documented machining parameters. Product value and average selling prices generally increase with diameter range, wall-thickness capability, automation, hazardous-area suitability, and the degree of application customization.

Downstream Market Opportunities

Oil, gas, and petrochemical activities remain the largest downstream demand base, particularly for refinery shutdowns, pipeline maintenance, LNG facilities, and offshore assets. Power generation and nuclear applications represent a smaller but higher-value segment because projects typically require stronger quality assurance, precision, documentation, and specialized operating configurations. Shipbuilding, offshore engineering, chemical processing, and industrial pipe fabrication provide recurring demand tied to maintenance cycles and capital projects. Emerging opportunities are developing in nuclear decommissioning, hydrogen and carbon-dioxide pipelines, high-purity semiconductor facilities, and automated pipe-spool fabrication. In these applications, customers are increasingly evaluating not only purchase price but also setup time, machining repeatability, tool life, technical support, and the ability to integrate the equipment into a controlled welding workflow.

Regional Insights

North America accounted for approximately 56% of 2025 market revenue and remained the largest regional market, supported by a concentration of established equipment groups, a large installed base of refineries and pipelines, nuclear and power-generation maintenance, and extensive use of rental and field-machining services. The region has a comparatively high-value product mix because large-diameter, low-clearance, hydraulic, nuclear, and customized systems represent a significant share of expenditure. Europe accounted for approximately 19%, with Germany, France, Italy,

and the United Kingdom supporting strong capabilities in heavy-wall cutting, orbital systems, offshore applications, and specialized machining.

China represented approximately 14% of revenue but had one of the largest populations of regional manufacturers, principally serving standardized split-frame equipment and export markets. India accounted for approximately 5% and has developed a smaller domestic manufacturing base linked to oil and gas construction, petrochemical investment, and engineering contractors. China and India offer substantial volume-expansion potential, while South Korea has a differentiated position in precision orbital systems and high-purity piping. Japan, Southeast Asia, and the Middle East remain important user markets but continue to depend heavily on imported equipment, distributors, rental organizations, and field-service providers.

Competitive Landscape Analysis

The Pipe Cold Cutting and Beveling Machine market has a moderately concentrated revenue structure combined with a fragmented regional supplier base. The five largest supplier groups represented approximately 54% of 2025 revenue, while the top ten accounted for about 71%. S.F.E. Group, Illinois Tool Works, Enerpac Tool Group, Tri Tool, and Mactech occupy strong positions through broad size coverage, established installed bases, application expertise, rental or service networks, and access to nuclear, offshore, and other demanding projects. Specialized European manufacturers compete through heavy-wall performance, chain-mounted technology, orbital machining, and very-large-diameter capabilities, while Chinese and Indian suppliers emphasize standardized equipment, shorter delivery times, and lower acquisition costs. Industry consolidation is becoming more important: Enerpac Tool Group announced an agreement in July 2026 to acquire S.F.E. Group, whose portfolio includes twelve fabrication, welding, and portable-machining brands. The transaction remained subject to regulatory approval and was expected to close in the first quarter of Enerpac's fiscal 2027, so the two groups continue to be treated separately in the current competitive analysis. If completed, the combination could strengthen channel coverage, cross-selling, service support, and product-platform integration across the global market.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the "Pipe Cold Cutting and Beveling Machine Industry Forecast" looks at past sales and reviews total world Pipe Cold Cutting and Beveling Machine sales in 2025, providing a comprehensive analysis by region and market sector of projected Pipe Cold Cutting and Beveling Machine sales for

2026 through 2032. With Pipe Cold Cutting and Beveling Machine sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Pipe Cold Cutting and Beveling Machine industry.

This Insight Report provides a comprehensive analysis of the global Pipe Cold Cutting and Beveling Machine landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Pipe Cold Cutting and Beveling Machine portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Pipe Cold Cutting and Beveling Machine market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Pipe Cold Cutting and Beveling Machine and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Pipe Cold Cutting and Beveling Machine.

This report presents a comprehensive overview, market shares, and growth opportunities of Pipe Cold Cutting and Beveling Machine market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

Clamshell Machines

Chain-Mounted Traveling Machines

Orbital Saw and Bevel Systems

Others

Segmentation by Drive Type:

Pneumatic Drive

Electric Drive

Hydraulic Drive

Others

Segmentation by Pipe Diameter Range:

Small Diameter?up to 6 in

Medium Diameter?over 6 to 24 in

Large Diameter?over 24 to 60 in

Extra-Large Diameter?over 60 in

Segmentation by Application:

In-Situ Maintenance and Repair

Shutdown and Turnaround

New Pipeline Construction

Others

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

S.F.E. Group LLC

Illinois Tool Works Inc.

Enerpac Tool Group Corp.

Tri Tool Inc.

Mactech, Inc.

PROTEM SAS

G.B.C. Industrial Tools S.p.A.

DWT GmbH

C.&E. Fein GmbH

POWERMASTER LTD

ESCO Tool Company

Aotai Machine Manufacturing

NODHA Industrial Technology Wuxi

Zhejiang Wellnit

Henan E-Work

BEVEL LTD

FABMAX

Ningbo SAIVS

Arte Makina

Key Questions Addressed in this Report

What is the 10-year outlook for the global Pipe Cold Cutting and Beveling Machine market?

What factors are driving Pipe Cold Cutting and Beveling Machine market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Pipe Cold Cutting and Beveling Machine market opportunities vary by end market size?

How does Pipe Cold Cutting and Beveling Machine break out by Type, by Application?

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global Pipe Cold Cutting and Beveling Machine Annual Sales 2021-2032
- 2.1.2 World Current & Future Analysis for Pipe Cold Cutting and Beveling Machine by Geographic Region, 2021, 2025 & 2032
- 2.1.3 World Current & Future Analysis for Pipe Cold Cutting and Beveling Machine by Country/Region, 2021, 2025 & 2032

2.2 Pipe Cold Cutting and Beveling Machine Segment by Type

- 2.2.1 Clamshell Machines
- 2.2.2 Chain-Mounted Traveling Machines
- 2.2.3 Orbital Saw and Bevel Systems
- 2.2.4 Others
- 2.2.5 Pipe Cold Cutting and Beveling Machine Sales by Type
 - 2.2.5.1 Global Pipe Cold Cutting and Beveling Machine Sales Market Share by Type (2021-2026)
 - 2.2.5.2 Global Pipe Cold Cutting and Beveling Machine Revenue and Market Share by Type (2021-2026)
 - 2.2.5.3 Global Pipe Cold Cutting and Beveling Machine Sale Price by Type (2021-2026)

2.3 Pipe Cold Cutting and Beveling Machine Segment by Drive Type

- 2.3.1 Pneumatic Drive
- 2.3.2 Electric Drive
- 2.3.3 Hydraulic Drive
- 2.3.4 Others
- 2.3.5 Pipe Cold Cutting and Beveling Machine Sales by Drive Type

2.3.5.1 Global Pipe Cold Cutting and Beveling Machine Sales Market Share by Drive Type (2021-2026)

2.3.5.2 Global Pipe Cold Cutting and Beveling Machine Revenue and Market Share by Drive Type (2021-2026)

2.3.5.3 Global Pipe Cold Cutting and Beveling Machine Sale Price by Drive Type (2021-2026)

2.4 Pipe Cold Cutting and Beveling Machine Segment by Pipe Diameter Range

2.4.1 Small Diameter?up to 6 in

2.4.2 Medium Diameter?over 6 to 24 in

2.4.3 Large Diameter?over 24 to 60 in

2.4.4 Extra-Large Diameter?over 60 in

2.4.5 Pipe Cold Cutting and Beveling Machine Sales by Pipe Diameter Range

2.4.5.1 Global Pipe Cold Cutting and Beveling Machine Sales Market Share by Pipe Diameter Range (2021-2026)

2.4.5.2 Global Pipe Cold Cutting and Beveling Machine Revenue and Market Share by Pipe Diameter Range (2021-2026)

2.4.5.3 Global Pipe Cold Cutting and Beveling Machine Sale Price by Pipe Diameter Range (2021-2026)

2.5 Pipe Cold Cutting and Beveling Machine Segment by Application

2.5.1 In-Situ Maintenance and Repair

2.5.2 Shutdown and Turnaround

2.5.3 New Pipeline Construction

2.5.4 Others

2.5.5 Pipe Cold Cutting and Beveling Machine Sales by Application

2.5.5.1 Global Pipe Cold Cutting and Beveling Machine Sale Market Share by Application (2021-2026)

2.5.5.2 Global Pipe Cold Cutting and Beveling Machine Revenue and Market Share by Application (2021-2026)

2.5.5.3 Global Pipe Cold Cutting and Beveling Machine Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Pipe Cold Cutting and Beveling Machine Breakdown Data by Company

3.1.1 Global Pipe Cold Cutting and Beveling Machine Annual Sales by Company (2021-2026)

3.1.2 Global Pipe Cold Cutting and Beveling Machine Sales Market Share by Company (2021-2026)

3.2 Global Pipe Cold Cutting and Beveling Machine Annual Revenue by Company

(2021-2026)

3.2.1 Global Pipe Cold Cutting and Beveling Machine Revenue by Company

(2021-2026)

3.2.2 Global Pipe Cold Cutting and Beveling Machine Revenue Market Share by Company (2021-2026)

3.3 Global Pipe Cold Cutting and Beveling Machine Sale Price by Company

3.4 Key Manufacturers Pipe Cold Cutting and Beveling Machine Producing Area Distribution, Sales Area, Product Type

3.4.1 Key Manufacturers Pipe Cold Cutting and Beveling Machine Product Location Distribution

3.4.2 Players Pipe Cold Cutting and Beveling Machine Products Offered

3.5 Market Concentration Rate Analysis

3.5.1 Competition Landscape Analysis

3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.6 New Products and Potential Entrants

3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR PIPE COLD CUTTING AND BEVELING MACHINE BY GEOGRAPHIC REGION

4.1 World Historic Pipe Cold Cutting and Beveling Machine Market Size by Geographic Region (2021-2026)

4.1.1 Global Pipe Cold Cutting and Beveling Machine Annual Sales by Geographic Region (2021-2026)

4.1.2 Global Pipe Cold Cutting and Beveling Machine Annual Revenue by Geographic Region (2021-2026)

4.2 World Historic Pipe Cold Cutting and Beveling Machine Market Size by Country/Region (2021-2026)

4.2.1 Global Pipe Cold Cutting and Beveling Machine Annual Sales by Country/Region (2021-2026)

4.2.2 Global Pipe Cold Cutting and Beveling Machine Annual Revenue by Country/Region (2021-2026)

4.3 Americas Pipe Cold Cutting and Beveling Machine Sales Growth

4.4 APAC Pipe Cold Cutting and Beveling Machine Sales Growth

4.5 Europe Pipe Cold Cutting and Beveling Machine Sales Growth

4.6 Middle East & Africa Pipe Cold Cutting and Beveling Machine Sales Growth

5 AMERICAS

5.1 Americas Pipe Cold Cutting and Beveling Machine Sales by Country

5.1.1 Americas Pipe Cold Cutting and Beveling Machine Sales by Country
(2021-2026)

5.1.2 Americas Pipe Cold Cutting and Beveling Machine Revenue by Country
(2021-2026)

5.2 Americas Pipe Cold Cutting and Beveling Machine Sales by Type (2021-2026)

5.3 Americas Pipe Cold Cutting and Beveling Machine Sales by Application
(2021-2026)

5.4 United States

5.5 Canada

5.6 Mexico

5.7 Brazil

6 APAC

6.1 APAC Pipe Cold Cutting and Beveling Machine Sales by Region

6.1.1 APAC Pipe Cold Cutting and Beveling Machine Sales by Region (2021-2026)

6.1.2 APAC Pipe Cold Cutting and Beveling Machine Revenue by Region (2021-2026)

6.2 APAC Pipe Cold Cutting and Beveling Machine Sales by Type (2021-2026)

6.3 APAC Pipe Cold Cutting and Beveling Machine Sales by Application (2021-2026)

6.4 China

6.5 Japan

6.6 South Korea

6.7 Southeast Asia

6.8 India

6.9 Australia

6.10 China Taiwan

7 EUROPE

7.1 Europe Pipe Cold Cutting and Beveling Machine by Country

7.1.1 Europe Pipe Cold Cutting and Beveling Machine Sales by Country (2021-2026)

7.1.2 Europe Pipe Cold Cutting and Beveling Machine Revenue by Country
(2021-2026)

7.2 Europe Pipe Cold Cutting and Beveling Machine Sales by Type (2021-2026)

7.3 Europe Pipe Cold Cutting and Beveling Machine Sales by Application (2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Pipe Cold Cutting and Beveling Machine by Country

8.1.1 Middle East & Africa Pipe Cold Cutting and Beveling Machine Sales by Country (2021-2026)

8.1.2 Middle East & Africa Pipe Cold Cutting and Beveling Machine Revenue by Country (2021-2026)

8.2 Middle East & Africa Pipe Cold Cutting and Beveling Machine Sales by Type (2021-2026)

8.3 Middle East & Africa Pipe Cold Cutting and Beveling Machine Sales by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 MANUFACTURING COST STRUCTURE ANALYSIS

10.1 Raw Material and Suppliers

10.2 Manufacturing Cost Structure Analysis of Pipe Cold Cutting and Beveling Machine

10.3 Manufacturing Process Analysis of Pipe Cold Cutting and Beveling Machine

10.4 Industry Chain Structure of Pipe Cold Cutting and Beveling Machine

11 MARKETING, DISTRIBUTORS AND CUSTOMER

11.1 Sales Channel

11.1.1 Direct Channels

11.1.2 Indirect Channels

11.2 Pipe Cold Cutting and Beveling Machine Distributors

11.3 Pipe Cold Cutting and Beveling Machine Customer

12 WORLD FORECAST REVIEW FOR PIPE COLD CUTTING AND BEVELING MACHINE BY GEOGRAPHIC REGION

12.1 Global Pipe Cold Cutting and Beveling Machine Market Size Forecast by Region

12.1.1 Global Pipe Cold Cutting and Beveling Machine Forecast by Region (2027-2032)

12.1.2 Global Pipe Cold Cutting and Beveling Machine Annual Revenue Forecast by Region (2027-2032)

12.2 Americas Forecast by Country (2027-2032)

12.3 APAC Forecast by Region (2027-2032)

12.4 Europe Forecast by Country (2027-2032)

12.5 Middle East & Africa Forecast by Country (2027-2032)

12.6 Global Pipe Cold Cutting and Beveling Machine Forecast by Type (2027-2032)

12.7 Global Pipe Cold Cutting and Beveling Machine Forecast by Application (2027-2032)

13 KEY PLAYERS ANALYSIS

13.1 S.F.E. Group LLC

13.1.1 S.F.E. Group LLC Company Information

13.1.2 S.F.E. Group LLC Pipe Cold Cutting and Beveling Machine Product Portfolios and Specifications

13.1.3 S.F.E. Group LLC Pipe Cold Cutting and Beveling Machine Sales, Revenue, Price and Gross Margin (2021-2026)

13.1.4 S.F.E. Group LLC Main Business Overview

13.1.5 S.F.E. Group LLC Latest Developments

13.2 Illinois Tool Works Inc.

13.2.1 Illinois Tool Works Inc. Company Information

13.2.2 Illinois Tool Works Inc. Pipe Cold Cutting and Beveling Machine Product Portfolios and Specifications

13.2.3 Illinois Tool Works Inc. Pipe Cold Cutting and Beveling Machine Sales, Revenue, Price and Gross Margin (2021-2026)

13.2.4 Illinois Tool Works Inc. Main Business Overview

13.2.5 Illinois Tool Works Inc. Latest Developments

13.3 Enerpac Tool Group Corp.

13.3.1 Enerpac Tool Group Corp. Company Information

13.3.2 Enerpac Tool Group Corp. Pipe Cold Cutting and Beveling Machine Product

Portfolios and Specifications

13.3.3 Enerpac Tool Group Corp. Pipe Cold Cutting and Beveling Machine Sales, Revenue, Price and Gross Margin (2021-2026)

13.3.4 Enerpac Tool Group Corp. Main Business Overview

13.3.5 Enerpac Tool Group Corp. Latest Developments

13.4 Tri Tool Inc.

13.4.1 Tri Tool Inc. Company Information

13.4.2 Tri Tool Inc. Pipe Cold Cutting and Beveling Machine Product Portfolios and Specifications

13.4.3 Tri Tool Inc. Pipe Cold Cutting and Beveling Machine Sales, Revenue, Price and Gross Margin (2021-2026)

13.4.4 Tri Tool Inc. Main Business Overview

13.4.5 Tri Tool Inc. Latest Developments

13.5 Mactech, Inc.

13.5.1 Mactech, Inc. Company Information

13.5.2 Mactech, Inc. Pipe Cold Cutting and Beveling Machine Product Portfolios and Specifications

13.5.3 Mactech, Inc. Pipe Cold Cutting and Beveling Machine Sales, Revenue, Price and Gross Margin (2021-2026)

13.5.4 Mactech, Inc. Main Business Overview

13.5.5 Mactech, Inc. Latest Developments

13.6 PROTEM SAS

13.6.1 PROTEM SAS Company Information

13.6.2 PROTEM SAS Pipe Cold Cutting and Beveling Machine Product Portfolios and Specifications

13.6.3 PROTEM SAS Pipe Cold Cutting and Beveling Machine Sales, Revenue, Price and Gross Margin (2021-2026)

13.6.4 PROTEM SAS Main Business Overview

13.6.5 PROTEM SAS Latest Developments

13.7 G.B.C. Industrial Tools S.p.A.
