Abstracts

The global Pipeless Heptafluoropropane Fire Extinguishing Device market size is predicted to grow from US$ 272 million in 2025 to US$ 401 million in 2032; it is expected to grow at a CAGR of 5.8% from 2026 to 2032.

A Pipeless Heptafluoropropane Fire Extinguishing Device is a gaseous fire suppression system that releases the extinguishing agent directly without the need for a piping network. The heptafluoropropane is stored in individual containers and discharged through control valves and nozzles, providing fast and efficient fire suppression. It is suitable for spaces such as server rooms, archives, and laboratories where piping installation is restricted or the environment is sensitive. In 2024, the global sales of Pipeless Heptafluoropropane Fire Extinguishing Devices are 269,000 units, with an average unit price of 970 USD per unit.The upstream of Pipeless Heptafluoropropane Fire Extinguishing Devices mainly consists of suppliers of raw materials and key components, such as heptafluoropropane extinguishing agent, high-pressure cylinders, control valves, nozzles, and electronic control systems. These materials are typically provided by chemical manufacturers, steel producers, and electronic component suppliers. The downstream applications are concentrated in data centers, archives, laboratories, museums, and other spaces where piping installation is limited or the environment is sensitive, serving to prevent fires and protect high-value assets. Fire protection installation companies and system integrators also constitute important downstream stakeholders. The annual output of a single assembly line for Pipeless Heptafluoropropane Fire Extinguishing Devices depends on assembly efficiency and work shifts. Under typical conditions, each production line can complete approximately 50 to 100 units per day. Assuming 250 working days per year, the annual output of a single line can reach around 12,500 to 25,000 units, meeting the demand for medium to large-scale production. The capacity can be further increased by adding additional shifts
