A pistol holster is a specially designed carrying device or container used to securely hold and carry a handgun or pistol. It is typically made from materials like leather, nylon, Kydex (a type of thermoplastic), or other durable materials.

With the changes in the social security situation and the increasing investment in police equipment by various countries, law enforcement agencies and the military have put forward higher requirements for the tactics, safety and convenience of individual equipment such as pistol holsters. At the same time, the civilian security market continues to heat up in Europe and the United States, and more and more people are buying guns and supporting equipment for self-defense purposes, which has promoted the consumption growth of holster products. In addition, the advancement of material technology has enabled new holsters to have lighter weight, stronger concealment, and faster gun draw, which has further expanded its application scenarios and driven the overall market demand to rise steadily.
