The global Piston Pump market size is predicted to grow from US\$ 2564 million in 2025 to US\$ 2918 million in 2031; it is expected to grow at a CAGR of 2.2% from 2025 to 2031.

A piston pump is a type of positive displacement pump where the high-pressure seal reciprocates with the piston. Piston pumps can be used to move liquids or compress gases. There are mainly two kinds of piston pumps, which are lift pump and force pump. The more complicated types are the Axial piston pump and Radial piston pump. These types may be operated either by hand or by an engine. With the development of the technology in this industry, the piston pumps are more automated and intelligent nowadays, and can provide convenience for more complicated and high-standard projects. Some piston pumps are replaced by the rotary pumps or other pumps, but piston pumps are still applied in many fields and are the basic industrial products.

There are many kinds of piston pumps in the market, the professional applications differed and the price also has a wide range according to different types.

Global Piston Pump key players include Bosch Rexroth Corporation, Kawasaki Heavy Industries, FMC Technologies, etc. Global top three manufacturers hold a share about 30%.

Europe is the largest market, with a share about 25%, followed by United States and China, both have a share about 45 percent.

In terms of product, Axial Piston Pump is the largest segment, with a share about 85%. And in terms of application, the largest application is General Industries, followed by Oil

and Gas Industry.
