A pizza rocker is a curved knife designed specifically for cutting pizza. It is usually made of a single piece of stainless steel and features an ergonomic double handle design. When in use, the pizza can be quickly and evenly cut into several pieces by 'shaking' the blade back and forth, hence the name 'rocker' or 'rocking cutter'. Compared to traditional wheel-type pizza cutters, pizza rockers are more labor-saving when cutting thick crust, cheese-rich or large-sized pizzas, with neat cuts and less likely to pull ingredients. Its common length is 14 to 16 inches, and there are also commercial models with specifications exceeding 18 inches, suitable for home kitchens, pizza shops and restaurant chains. Many professional pizza chefs prefer this tool because it improves cutting efficiency and simplifies the cleaning process. It is one of the common standard accessories in American pizza making.
