## Abstracts

The global PLA Shrink Film market size is predicted to grow from US\$ 474 million in 2025 to US\$ 744 million in 2032; it is expected to grow at a CAGR of 6.6% from 2026 to 2032.

PLA shrink film is a biodegradable packaging material made from polylactic acid (PLA) derived from renewable resources such as corn starch or sugarcane. Due to its transparency, shrinkability, and environmental friendliness, it is widely used in food packaging, consumer goods, and industrial applications. PLA shrink film provides effective protection and aesthetically pleasing packaging while helping to reduce plastic waste. The upstream of the industry chain includes PLA resin production, additives, and coating materials; the midstream involves film extrusion, orientation, shrinkage testing, and quality control; downstream applications cover food packaging, beverage bottles, retail packaging, and logistics, and include installation, customization, and recycling services. In 2025, global PLA shrink film production was approximately 107,800 tons, with a global average market price of approximately US\$4.5 per kilogram. The gross profit margin of major companies in the industry ranged from 20% to 35%. In 2025, global PLA shrink film production capacity was approximately 130,000 tons.

The PLA shrink film market is driven by increasing environmental awareness, government regulations on single-use plastics, and rising demand for sustainable packaging solutions. Growth in food and beverage, retail, and e-commerce sectors supports the adoption of biodegradable shrink films. Technological advancements in PLA resin processing, film extrusion, and shrink performance improve durability, clarity, and usability. Consumers and companies increasingly prefer eco-friendly materials to reduce plastic waste and carbon footprint. Overall, the market is expected to grow steadily as industries adopt biodegradable packaging solutions and prioritize sustainability, regulatory compliance, and consumer preference for environmentally responsible products.
