The global Plant Bakuchiol market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Bakuchiol is a natural, plant-derived alternative to a retinoid or retinol. Bakuchiol has been shown to mimic the action of retinol in a variety of in vitro tests because it's a molecule very similar in structure. Like retinol, bakuchiol is a skin-cell growth stimulator and an antioxidant that helps regenerate cells. The natural plant compound has been shown to be gentler than retinol, with similar anti-ageing benefits. Because of the lack of skin irritation, Bakuchiol is appropriate for all skin types and could be used during pregnancy.
