The current category is evolving to meet consumer demand for plant-based products that are healthy, flavourful, versatile and fun. And with the introduction of new products, new ingredients, and new technologies, people's concerns and purchase barriers are being eliminated, and the consumer base is rapidly expanding, far beyond traditional enthusiasts.

Consumers also expect that their choices of plant-based products are good for the planet. Health may be the number one reason driving consumers to plant-based foods, but environmental health is also becoming more important. Ethical factors are expected to gain more importance in the future plant-based market. Consumers are becoming more aware of the environment and its relationship to nutrition.
