Plasma air sterilizer, with the international advanced level of plasma air sterilizer, uses (SPIC) super ion generator to instantly stimulate trillions of positive and negative ions, which can efficiently sterilize, the plasma sterilization and disinfection effect is extremely strong, and the action time Short, is far less than high-intensity ultraviolet rays. Plasma is the fourth form following solid, liquid and gaseous states. The SPIC super-energy ion cloud releases trillions of positive and negative electrons, and generates a large amount of energy through the annihilation of positive and negative ions, thereby destroying the bacterial envelope and killing the nucleus.
