The global Plastic Cable Waterproof Gland market size is predicted to grow from US\$ 1110 million in 2025 to US\$ 1659 million in 2032; it is expected to grow at a CAGR of 6.0% from 2026 to 2032.

A cable connection device made of plastic materials, designed to secure and protect the entry and exit points of cables while providing waterproofing, dustproofing, and tensile resistance. Plastic cable glands are commonly used in machinery, electrical control panels, lighting equipment, and other applications. They are lightweight, corrosion-resistant, easy to install, and suitable for a wide range of industrial and commercial environments. In 2024, the global production of plastic cable waterproof glands was approximately 1.63 billion units, with an average price of USD 0.65 per unit.

Plastic cable waterproof glands are essential components for securing, sealing, and protecting cable entry points in various applications, including industrial automation, outdoor lighting, communication cabinets, and renewable energy systems. Compared with metal glands, plastic variants—typically made from PA (nylon) or flame-retardant composites—offer enhanced electrical insulation, reduced weight, and lower cost, making them ideal for mid- to low-load, IP65+ rated environments. Globally, demand for plastic cable glands is growing steadily, fueled by the expansion of solar energy, outdoor power storage, EV charging infrastructure, and smart transportation systems. Product innovation is trending toward modular structures, quick-mounting mechanisms, wide cable diameter compatibility, UV resistance, and V0-grade flame retardancy. Chinese manufacturers dominate the low- to mid-end segment, with players like Beisit Electric Tech, Zhejiang Bangnai Electric, and China Super Holdings in volume and increasingly offering custom solutions for high-spec applications. As global industries seek lightweight and environmentally friendly solutions, and as China continues to

advance in injection molding and tooling precision, domestic suppliers are well-positioned to move up the value chain and challenge incumbents in the mid- to high-end international market.
