A plastic hopper dryer is a machine specifically designed for drying or dehumidifying plastic granules or resin materials. It is commonly used in the plastic industry during the manufacturing process, where moisture-free plastic materials are required for quality end products.

The plastic hopper dryer consists of a main hopper or drying chamber that stores the plastic granules. Inside the hopper, there is an electric heating element or a hot air generator that provides the heat necessary for the drying process. The heated air, circulated by a blower, flows through the hopper and absorbs the moisture from the plastic granules, drying them effectively.
