Plastic manhole covers have the advantages of light weight, corrosion resistance, insulation, easy handling and installation. They are usually used in light traffic areas, such as walking paths, bicycle paths and parks, and in some environments that require corrosion protection or electrical insulation, such as chemical plants, power stations and

other places. The design and manufacture of plastic manhole covers follow the relevant national standards to ensure that their quality and safety performance meet the requirements. At the same time, plastic manhole covers also need regular inspection and maintenance to ensure their long-term reliable use.
