Recycled plastics are the plastics that made from post-consumer or post-industrial plastics instead of the virgin resin. The process of recycling used plastic from consumable products is an efficient means to reprocess the material into useful products. Many different products make great sources of recyclable material, including: soda bottles, plastic packaging, sheets and pellets. Recycled plastic is used to make many different types of products. The type of product that is made out of recycled plastic depends on the type of plastic resin. There are several different types of plastic resin used to make different products, such as PET, PP, HDPE and LDPE.

Global plastic recycling key players include Indorama Ventures, Far Eastern New Century, MBA Polymers, etc. Global top 10 manufacturers hold a share about 2.7%.

China is the largest market, with a share over 40%, followed by North America and
