The global Plastic Waste Management market size is predicted to grow from US\$ 35650 million in 2025 to US\$ 46320 million in 2031; it is expected to grow at a CAGR of 4.5% from 2025 to 2031.

Plastic waste management is a collective term for various approaches and strategies used to recycle plastic materials that would otherwise be dumped into landfills, or bodies of water, or otherwise contaminate the environment. The idea behind this type of waste management is to utilize those discarded materials to manufacture new plastic products without the need to actually generate additional plastic materials. Doing so can help lower production costs as well as protect the environment.

Plastic Waste Management companies include Veolia Environnement, Suez Environnement, Waste Management, Republic Services, Stericycle, Clean Harbors, ADS Waste Holdings, Progressive Waste Solutions and Covanta Holding. Veolia Environnement owns the biggest plastic waste treatment capacity, with about 1.5% market shares. North America is the largest consumption place, with a consumption market share nearly 25%.
