The global Plasticizer SJ-103 market size is predicted to grow from US\$ 18.68 million in 2025 to US\$ 24.02 million in 2032; it is expected to grow at a CAGR of 3.6% from 2026 to 2032.

SJ-103, a thiophenol-based, high-efficiency chemical plasticizer, is light gray/off-white and suitable for the plasticizing of natural and synthetic rubber. It significantly improves plasticizing efficiency, shortens plasticizing time, and has no adverse effects on the physical, mechanical, and aging properties of rubber, making it an ideal energy-saving additive.

Upstream core raw materials include pentachlorothiophenol, zinc pentachlorothiophenol salt, and activators, dispersants, and dust suppressants as carriers. The midstream stage involves the compounding and production of the plasticizer. Manufacturers combine the active ingredients with an inert carrier through precise formulation to produce a light gray or light yellow powder/granule product. Downstream supply connects to the rubber product manufacturing industry.

Global sales are projected to reach approximately 6,000 tons in 2025, with an average selling price of US\$3,183 per ton. The industry's gross profit margin is around 24%.
