The global Plate Heat Exchanger Cleaning Services market size is predicted to grow from US\$ 1499 million in 2025 to US\$ 2294 million in 2032; it is expected to grow at a CAGR of 6.3% from 2026 to 2032.

Plate heat exchanger cleaning services refer to the professional cleaning, maintenance, and upkeep of plate heat exchanger equipment to ensure its efficient and safe operation. Plate heat exchangers are widely used in industries such as chemical, food, pharmaceutical, HVAC, and air conditioning due to their compact structure and high heat exchange efficiency. However, after prolonged use, dirt, scale, or microorganisms may accumulate inside the heat exchanger, reducing heat exchange efficiency and even causing equipment damage. Cleaning services typically include multiple tasks such as descaling, cleaning, disinfection, and repair of the plates, aiming to restore heat exchange efficiency, extend equipment lifespan, and ensure compliance with relevant hygiene or safety standards.

With the continuous advancement of industrialization, especially in energy-intensive industries, the application of plate heat exchangers as core heat exchange equipment is becoming increasingly widespread. Long-term operation of heat exchangers is affected by scale, oil, and chemical contaminants, leading to reduced efficiency or even malfunction. Therefore, plate heat exchanger cleaning and maintenance services have become an important means to ensure production efficiency, reduce energy consumption, and minimize equipment failure. With increasingly stringent environmental regulations and heightened awareness of equipment maintenance among businesses, the demand for plate heat exchanger cleaning will continue to grow. It is anticipated that in the future, with continuous advancements in cleaning technology and increasing industry demand, plate heat exchanger cleaning services will gain a larger market share

globally, particularly in industrialized countries and regions such as Asia, Europe, and North America, where the cleaning service market will continue to expand.
