First of all, environmental protection is an important application field of pleated filters. Because the filter can be folded, it is easy to carry and store, and can be widely used in various environments, such as filtering air and improving air quality in factory facilities or public places. With the increasing awareness of environmental protection and strict requirements for air pollution control worldwide, the demand for pleated filters is likely to further increase. Secondly, with the advancement of technology, the development of mini pleated filters will make it possible to achieve a larger application space. These filters may be used in various devices, such as wearable devices, medical devices, precision electronic equipment, etc. In these devices, filters can serve to protect sensitive internal components from damage by airborne contaminants, extending the overall life of the device.
