Plenum slot diffusers are devices used for air distribution at air conditioning system outlets. They uniformly distribute air into indoor spaces by setting a series of slots at the outlet. These devices utilize the deflecting action of the plenum chamber to discharge air from the outlet at a lower velocity and higher uniformity, thus improving air distribution efficiency and comfort. Plenum slot diffusers are typically installed on ceilings or walls and are suitable for various indoor environments. They offer advantages such as uniform air distribution, low noise levels, and ease of installation and maintenance. In large meeting rooms, exhibition halls, theaters, and other venues requiring efficient air distribution and comfortable indoor environments, plenum slot diffusers are ideal choices.
