The pneumatic bellows pump is a positive displacement pump. That is, a reciprocating pump whose working chamber is a bellows. The bellows is isolated from the atmosphere, forming a closed working cavity. The pneumatic bellows pump is a leak-free pump. The bellows are mostly rubber or plastic materials, suitable for transporting strong corrosive liquids; no leakage, but also suitable for transporting toxic, harmful, flammable, explosive and valuable liquids. Contains granular and paste-like materials, but the flow rate is small, and the discharge pressure is low.
