A nail gun, nailgun or nailer is a type of tool used to drive nails into wood or some other kind of material. It is usually driven by compressed air (pneumatic), electromagnetism, highly flammable gases such as butane or propane, or, for powder-actuated tools, a small explosive charge. Nail guns have in many ways replaced hammers as tools of choice among builders.

Pneumatic nailer also called pneumatic nail gun is a nailer driven by compressed air (pneumatic), in order to work, pneumatic nail guns need to be connected to an air compressor. They are by far the most powerful and reliable type although, there are some disadvantages to using them such as the limited range of movement since your nail gun is connected to the compressor.
