According to our (LP Info Research) latest study, the global Pneumatic Wafer Butterfly Valve market size was valued at US\$ million in 2022. With growing demand in downstream market and recovery from influence of COVID-19 and the Russia-Ukraine War, the Pneumatic Wafer Butterfly Valve is forecast to a readjusted size of US\$ million by 2029 with a CAGR of % during review period.

The research report highlights the growth potential of the global Pneumatic Wafer Butterfly Valve market. With recovery from influence of COVID-19 and the Russia-Ukraine War, Pneumatic Wafer Butterfly Valve are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Pneumatic Wafer Butterfly Valve. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Pneumatic Wafer Butterfly Valve market.

As the name suggests, the pneumatic wafer butterfly valve adopts the method of wafer clamping, clamping the butterfly valve between the flanges at both ends of the pipeline, and then fixing it with a set of bolts through the bolt holes. The main advantages of the pneumatic flange butterfly valve are simple structure, small size, light weight, and low cost. The characteristics of the pneumatic butterfly valve are especially remarkable. The fluid resistance is small. The medium and large diameter pneumatic disc valve has a large effective flow area when it is fully opened, and the opening and closing is quick and labor-saving. The disc wrench rotates at an angle of 90 to complete the opening

and closing. Since the medium force of the disc wrench on both sides of the shaft is nearly equal, the torque generated is in the opposite direction, so the opening and closing torque is small, and a good seal can be achieved under low pressure. It has excellent sealing performance at low temperature.
