POE photovoltaic packaging film is a special film material used for packaging solar photovoltaic modules. It is usually made of polyvinyl alcohol (POE) and has high transparency, weather resistance and chemical stability. POE photovoltaic packaging film is used in the packaging process of solar panels, covering the solar cells to protect and seal. This membrane material effectively prevents moisture, dust and other contaminants from entering the cells, while allowing solar rays to pass through and be absorbed by the cells, thereby converting them into electricity. POE photovoltaic encapsulation films are widely used in the solar photovoltaic industry to improve the performance and life of photovoltaic modules.

The global POE Photovoltaic Packaging Film market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
