The global Polybutadiene market size is predicted to grow from US\$ 9995 million in 2025 to US\$ 12010 million in 2031; it is expected to grow at a CAGR of 3.1% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Polybutadiene is a synthetic rubber. Polybutadiene rubber is a polymer formed from the polymerization of the monomer 1,3-butadiene. Polybutadiene has a high resistance to wear and is used especially in the manufacture of tires, which consumes about 70% of the production. Another 25% is used as an additive to improve the toughness (impact resistance) of plastics such as polystyrene and acrylonitrile butadiene styrene (ABS).

Asia Pacific is estimated to dominate the polybutadiene market, owing to the rising demand for polybutadiene driven by its increased use in end-use industries. Europe is the second-largest consumer of polybutadiene, globally. The market in this region is mainly driven by the growth in the automotive industry.
