Polyester corespun sewing threads are high-performance threads constructed by wrapping a sheath of staple polyester fibers around a core of continuous filament polyester. This unique dual-layer structure combines the strength and durability of the filament core with the smooth finish and flexibility of the staple fiber sheath. The result is a thread that is exceptionally strong, durable, and versatile, making it suitable for a wide range of sewing applications, including apparel, home textiles, automotive upholstery, and outdoor gear. Additionally, polyester corespun threads offer excellent colorfastness and resistance to abrasion, chemicals, and UV radiation, making them an ideal choice for both everyday and specialized sewing projects.
