The global Polyester Film Capacitors market size is predicted to grow from US\$ 495 million in 2025 to US\$ 640 million in 2031; it is expected to grow at a CAGR of 4.4% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Plastic film capacitors are insulated with polyester, polypropylene, polystyrene or other dielectric materials. Polyester film capacitors offer a high dielectric constant and high dielectric strength.

Factors such as high demand for film capacitor in consumer electronics components, rise in demand for high temperature film capacitors, and adoption of nanolayer film capacitors drives the growth of the film capacitor market. However, increase in severity of environmental and manufacturing rules and low pricing margin hamper the film capacitor market growth. Furthermore, higher adoption of film capacitor in electric vehicle system and technological advancements offer lucrative opportunities for the market growth.
