The global market for heat shrinkable tubing is driven by a wide range of applications across various industrial verticals. Heat shrink tubing is used in a variety of applications, from sterilization protection and packaging to food packaging to laminating wire insulation. It is also used in several applications in the aerospace industry. Heat shrink tubing can be found in almost every space on the aircraft and can be associated with the EWIS components of the aircraft. Heat shrink tubing protects the wire repair from liquids and provides additional protection against abrasion. Demand for EVs will grow faster from 2021 due to increased investment in manufacturing plants, increased demand for low-emission vehicles, and increasing supportive regulations for zero-emission vehicles through subsidies and tax rebates. According to the Global Electric Vehicle Outlook, sales of electric vehicles (including pure electric vehicles and plug-in hybrid vehicles) accelerated to a new record of 6.6 million in 2021. The same report showed that electric vehicle sales in China will surge to 3.3 million in 2021, accounting for about half of the global total. EV sales in Europe also rose strongly by 65%, or 2.3 million, with sales in the US doubling to 630,000 in 2021. Rising demand for corded appliances along with the growing trend of electric vehicles is driving the heat shrink tubing market.
