Polyester Straps or Polyester strapping, PET strapping is characterized by a very consistent tensile strength and very high elongation. Characteristics that are most decisive factor for a safe and reliable strapping method. Unlike strapping made from steel, Polyester strapping having its very high elongation, is able to absorb shocks and impacts during transportation and handling far better than steel strapping is capable of. The excellent elongation allows the substitution for the same application with Polyester strap having a lower breaking strength.

The global Polyester Straps market size is projected to grow from US\$ 709 million in 2024 to US\$ 872 million in 2030; it is expected to grow at a CAGR of 3.5% from 2024 to 2030.
