Polyimide polymers are derived from monomers of imide group, a functional group comprising two acyl groups. Imides are primarily employed in the manufacturing of high strength polymers for varied applications. Anhydrides, dicarboxylic acid, ammonia and some amines are among major raw materials used for the production of imides. Polyimide and imide polymers are polymers with high thermal stability and contain imide group.

Global Polyimide and Imide Polymer key players include DUPONT, SABIC, Ube Industries, etc. Global top three manufacturers hold a share about 65%.

China is the largest market, with a share about 50%, followed by Europe and Japan, both have a share about 35 percent.

In terms of product, PI is the largest segment, with a share over 86%. And in terms of application, the largest application is Electronic, followed by Car.
