Polynorbornene or polynorbornylene (PNB) is an amorphous, transparent thermoplastic with high glass transition temperature ( $> 310\text{K}$ ). The monomer norbornene is produced via Diels-Alder reaction of ethylene and cyclopentadiene and the polymer via ring-opening metathesis polymerization (ROMP) of norbornene (Norsorex process). The resulting polymer contains double bonds in the backbone and can be crosslinked yielding elastomers.
