The global Polypropylene Oxide market size is predicted to grow from US\$ 1275 million in 2025 to US\$ 2118 million in 2031; it is expected to grow at a CAGR of 8.8% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Polypropylene oxide is the polymer of propylene glycol. Chemically it is a polyether. The term polypropylene glycol or PPG is reserved for low to medium range molar mass polymer when the nature of the end-group, which is usually a hydroxyl group, still matters. The term 'oxide' is used for high molar mass polymer when end-groups no longer affect polymer properties.

This industry is greatly affected by industry chains and policies, so we must pay attention to changes in the upstream raw material market and fluctuations in downstream application industries.
