The global Polypropylene (PP) Strapping Band market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Polypropylene (PP) strapping band, commonly known as a polypropylene band, is a versatile material used in packaging. It aids in transportation and prevents package damage.

Polypropylene bands are mainly used for bundling packages. Unlike gummed tape, they are wrapped around cardboard and other packing materials for secure holding. They are ideal for bundling multiple packages for easy transfer to a forklift and preventing accidental unbundling. Other uses include binding cables and pipes, in agriculture, and handicrafts. For outdoor use, especially long-term, choosing UV-resistant bands or periodic replacement is necessary.
