The global Polyurethane Shock Absorbers market size is predicted to grow from US\$ 171 million in 2025 to US\$ 266 million in 2032; it is expected to grow at a CAGR of 6.5% from 2026 to 2032.

In 2025, global sales of polyurethane shock absorbers reached 5 million units, with an average selling price of \$35 per unit. Polyurethane shock absorbers are vibration damping devices made of polyurethane material, primarily used to reduce vibrations and impacts generated during the operation of machinery, vehicles, and buildings. Through high elasticity and excellent wear resistance, they effectively absorb and isolate vibration energy, reducing equipment wear and extending service life. Polyurethane shock absorbers are widely used in various fields such as automobiles, rail transportation, machinery, construction facilities, and electronic equipment.

Upstream raw materials mainly include polyurethane resin, hardeners, plasticizers, and fillers, primarily sourced from global chemical raw material suppliers. Downstream supplies mainly come from automobile manufacturers, machinery manufacturers, construction companies, and electronic equipment companies. In the future, with the increasing demand for lightweight and intelligent vehicles, as well as stricter requirements for environmental protection and noise control, polyurethane shock absorbers will develop towards higher performance, greater environmental friendliness, and greater intelligence. The industry's total production capacity is approximately 6.5 million units per year, with a gross profit margin of approximately 30%. Downstream consumption is mainly concentrated in the automotive and machinery industries, followed by the construction and electronics industries; polyurethane resin and hardeners account for a relatively high proportion of upstream material consumption. On the demand side, the polyurethane shock absorber market continues to expand, driven

by industrial automation, transportation infrastructure construction, and environmental regulations, especially in the construction and infrastructure development of emerging markets, which has brought a large number of business opportunities.

United States market for Polyurethane Shock Absorbers is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Polyurethane Shock Absorbers is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
