Pop rivet gun is a tool specially used for installing pop rivets (also called 'POP' rivets or blind rivets), which is widely used in sheet metal processing, home appliance manufacturing, automobile repair, building assembly and other scenarios. Its working principle is to insert the pop rivet into the pre-drilled hole, and by pulling the rivet core rod, the tail of the rivet expands and deforms, thereby firmly connecting the two workpieces. The pop rivet gun is suitable for various operating environments. It has the advantages of quick installation, stable connection, and no need to contact the back of the workpiece. It is an important tool for achieving efficient riveting.
