The global Portable Air Conditioning System market size is predicted to grow from US\$ 1010 million in 2025 to US\$ 1539 million in 2031; it is expected to grow at a CAGR of 7.3% from 2025 to 2031.

Portable air conditioners are a device to modify the condition of air (heating, cooling, but mainly cooling). Perfect for a variety of cooling situations, portable air conditioners are great alternatives to traditional air conditioning systems because they're compact, mobile, and require no permanent installation. Moreover, because they're usually used to cool only certain parts of a home or as a supplement to central air conditioners, they can be much more cost-effective to run. Portable air conditioners use refrigerants to reduce the temperature. During the cooling process, moisture is condensed out of the air and collected in a drain bucket or exhausted out through a drain hose or evaporated out the exhaust. The heating system uses PTC heating technology, fast heat transfer, high efficiency, and low power consumption.

Global Portable Air Conditioning System key players include DeLonghi, JMATEK, Electrolux, LG, Carrier etc. Global top five manufacturers hold a share over 50%.

North America is the largest market, with a share over 50%, followed by Europe and China, both have a share over 30% percent. In terms of product, Portable Air Conditioner For Medium Room is the largest segment, with a share over 60%. And in terms of application, the largest application is Residential Care Facilities & Apartment Communities, followed by Equipment & Server Rooms.
