A portable chlorophyll meter, also known as a chlorophyll meter or SPAD meter, is a handheld device used in agriculture and plant science to measure the chlorophyll content or chlorophyll concentration in plant leaves. Chlorophyll is a pigment responsible for photosynthesis, the process by which plants convert sunlight into energy and produce carbohydrates. Monitoring chlorophyll levels can provide valuable information about a plant's health, nutrient status, and overall photosynthetic efficiency.

Many modern chlorophyll meters are designed to work in conjunction with smartphone or tablet apps. These apps allow users to capture, store, and analyze chlorophyll data in the field and easily share it with other stakeholders.
