## Abstracts

The global Portable Circumferential Beam X-ray Source market size is predicted to grow from US$ 551 million in 2025 to US$ 761 million in 2031; it is expected to grow at a CAGR of 5.5% from 2025 to 2031.

The portable circumferential beam X-ray source is an X-ray emitting device designed for field use. It can radiate X-rays simultaneously on a 360° circumference perpendicular to the axis of the X-ray tube. This design makes it particularly suitable for detecting annular welds of large-diameter pipes and spherical containers. The flaw detection photography of the entire weld can be completed with one exposure, thus significantly improving the detection efficiency.
