The global Portable Diffusion Gas Detector market size is predicted to grow from US$ 943 million in 2025 to US$ 1362 million in 2032; it is expected to grow at a CAGR of 5.5% from 2026 to 2032.

In 2024, the global market price for portable diffusion gas detectors will be US$374 per unit, with sales of approximately 2.448 million units, and global single-line production capacity ranging from 30,000 to 80,000 units per year. Portable diffusion gas detectors are portable electronic devices based on the principle of natural gas diffusion, capable of real-time detection of specific gas concentrations in the environment. The upstream supply chain core consists of suppliers of raw materials and components such as gas sensor chips (e.g., electrochemical, infrared, and semiconductor), MCU main control chips, batteries, and housing components. The midstream segment comprises companies that design, assemble, and develop software algorithms for the detectors. Downstream customers are extensive, primarily including industrial safety (petrochemical and mining worker protection), environmental monitoring (on-site law enforcement by environmental protection departments), emergency response (firefighting and public security handling of hazardous leaks), and civilian applications (formaldehyde detection in homes).

United States market for Portable Diffusion Gas Detector is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Portable Diffusion Gas Detector is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Portable Diffusion Gas Detector is estimated to increase from US$
