A portable magnetic drill press, also known as a mag drill or magnetic drilling machine, is a specialized tool used in metalworking and construction. It's designed to drill precise holes into metal surfaces, typically steel, in situations where traditional drill presses may not be feasible or practical. The key feature of a portable magnetic drill press is its ability to adhere securely to the metal surface via an electromagnetic base, providing stability and accuracy during drilling. This magnetic base allows the drill to be used horizontally, vertically, or even upside down, making it versatile for various drilling applications, including fabrication, construction, and maintenance work.

The global Portable Magnetic Drill Presses market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
